INTRODUCTION

This hands-on course includes both theoretical interactive presentations, practical case review on dedicated mammography workstations and practical clinical implementation through live patient procedure monitoring in small groups. The Careggi University team built this course from their data base of over 9,500 cases, drawing on experience from publishing 2 books and over 20 peer-review publications.

LEARNING OBJECTIVES

- Acquire knowledge which allow to implement and improve the use of Contrast Enhanced Mammography (CEM) in clinical routine practice
- Understand the CEM lexicon and develop proficiency in report drafting
- Get a good understanding of when to use CEM imaging and CEM guided biopsy
- Improve diagnostic skill in Contrast Enhanced Mammography (CEM) through interactive case review, with expert tutors

DAILY PROGRAM

Friday May 22nd

08.30 - 09.00 Opening Remarks and Course Presentation
J. Nori Cucchiari; V. Miele; D. De Benedetto
